

Microsoft Office 365 Migration and Managed Services

Overview

Make the Move to Office 365 Simple with Your Provider of Choice

Simplify the migration to Office 365. With a range of easy to consume pay per month services, migrating to Office 365 and delivering ongoing value has never been easier. Our packaged services, available through your trusted IT reseller of choice allow you to keep your internal IT team focused on your corporate goals while we take care of your tenant with our 24/7 service desk

Office 365 Backup as a Service - secures company data including Exchange Online, SharePoint Online and OneDrive. You can receive a free migration to Office 365 when subscribing to a 12, 24 or 36-month contract

Office 365 Administration as a Service – enables you to outsource the administration of your Office 365 tenancy

Office 365 Reporting as a Service – provides easy to interpret data that helps to reduce costs, identify security risks and maintain visibility of usage and changes in your Office 365 environment

Office 365 Discover & Audit - an insurance policy providing reporting on all Office 365 internal and external access and security activity to quickly isolate events or threats

1

Office 365 SMB Migration Services

Packaged Migration Services for on-premises Exchange, Google Mail and IMAP mail services. We migrate mailboxes, public folders, distribution lists and can perform the required desktop changes. Our services are priced either per mailbox or on a per user/month contract, starting as low 10 mailboxes.

2

Office 365 Complex Migrations

Our Office 365 migration team will work with you to understand the required business outcomes. We will design an end-to-end migration to suit the requirements, setting up identity, Active Directory, migrating Exchange, Lotus Notes, POP, IMAP, GroupWise and many other mail platforms.

3

Office 365 Backup as a Service

Office 365 Backup as a Service (BaaS) is a complete backup service for your Office 365 environment. In the case of a catastrophic failure or accidental deletion, Office 365 BaaS is critical to getting a business online immediately. We manage backups end-to-end, covering Exchange Online, SharePoint Online and OneDrive for Business. The service includes restores and reporting for a low monthly fee with no data limits.

4

Office 365 Administration as a Service

Our Administration as a Service (AaaS) is designed to be standalone or to augment the administration services offered by your existing Microsoft reseller. The service provides all things administration from tenancy management and user/group creation to license assignment and adding of services.

5

Office 365 Reporting and Monitoring

Reporting for Office 365 is critical to ensuring the environment is running efficiently and you are getting the best possible return on their investment. Our service provides regular reporting to help identify services not being used, manage security and measure return on your Office 365 investment.

6

Office 365 Discover and Audit

With all the cyber threats today and the sensitivity of business data, it is critical to protect your environment against any sort of attack. Our Discover and Audit service allows us to monitor all internal and external access and security activity, isolating events or threats quickly, unlike the native Office 365 audit log which provides all activity in one large, unwieldy view.
