

# Smart Internet

The business Internet service that is a gateway to your Cloud services

## Multiple services over one connection.

Constor's Business Internet service provides business-grade, end-to-end fibre from your premises all the way to a 100GigE core Network. The Network is a business-only Network with no disruption from consumer peaks in traffic. This means our customers receive ultra-fast, symmetrical and fully scalable Internet connectivity.

Constor's Business Internet service provides business-grade, end-to-end fibre from your premises all the way to a 100GigE core Network. The Network is a business-only Network with no disruption from consumer peaks in traffic. This means our customers receive ultra-fast, symmetrical and fully scalable Internet connectivity.

### What's smart about Smart Internet?

The service provides uncontended and scalable bandwidth for all the critical services your company needs - both now, and in the future.

Over our Business Internet Access Service customers can run all the different types of services and applications Constor offers.

The clever part is that if you don't need the entire capacity of your connection for Internet, you can split the circuit using secure VLANs and use it to deliver other services and applications, reducing infrastructure costs.

Consolidating services across one connection means you get a flatter and easier-to-manage Network, reducing the day-to-day technical and administrative burden placed on your staff.

### IPV6 Ready Internet

Having plenty of IPv4 addresses doesn't protect a business from other organisations running out of IPv4 elsewhere on the Internet. When IPv4 runs out, businesses can no longer make the assumption that the entire internet will be reachable or that they themselves will be universally reachable. We advocate that our customers take steps to prepare their Networks for 'both Internet's'.

Want to have absolute visibility and control of your Internet service? Constor also provides an application control system via its Bandwidth Management System.

It is a unique service delivered from the Cloud via a web portal which means expensive appliances are no longer required to shape your application and Internet bandwidth.

## SMART INTERNET FEATURES

- Fully managed service with our Ethernet Demarcation Device (EDD).
- Service is IPv4 and IPv6 compliant as standard.
- Scalable capacity over our 100GigE core Network.
- Hundreds of peering relationships and integration with the world's major content providers make the Internet just one hop away.
- Cloud-ready Internet.
- Uncontended Internet with symmetrical upload and download speeds.
- 24 / 7 x 365 technical support for assistance.
- Split the connection into multiple secure VLANs to deliver several services over the same pipe

## SMART INTERNET BENEFITS

- Cost Savings, including:
- Consolidating voice, video and data services across one connection with one connection fee.
- Our installation process is a simple plug-and-play deployment, doing away with expensive hardware and setup costs.
- Adaptable and scalable, our infrastructure can easily grow with your requirements.
- Highly available support - backed up by strict Service Level Agreements. 24 / 7 x 365 technical support.

## ABOUT CONSTOR

Constor Solutions is a progressive and forward-thinking organization dedicated to the pursuit of global growth opportunities. As a Company, we strive to attain success in ways that reflect the integrity of the people we invest in as employees or as business partners. No matter what our strategy is, or how good our assets are, the key to business success is always people.

We invite you to explore this site as a gateway into the businesses and relationships we have helped to create and continue to support. You'll discover the many ways that we are applying the knowledge we have been accumulating since 2013.
