

## **Technical Support and Managed Services**

Constor Solutions helps you, adopt complex technologies with confidence.

Constor Solutions are an award-winning partner who offer consultancy, managed services, and professional services combined with enterprise class hardware and software. Our core focus is within data storage, cyber recovery, data protection and server virtualisation. Our core skills focus on reducing operating costs and simplifying the operational management of data storage environments. This can encompass server & storage consolidation and virtualisation, back-up management reporting, disaster recovery & business continuance, email archiving and file lifecycle management.

Our independent approach and technical knowledge enables us to establish and advise the most appropriate technology driven outcome that suits your business needs. Constor provide a single point of contact to support for the entire solution and work in conjunction with vendors support agreements ensuring the availability of your infrastructure and the ongoing competitiveness of your business.
